RIGHT PRODUCT

INCREASE SALES, REDUCE INVENTORY, AND IMPROVE CUSTOMER SERVICE

Datalliance – Your Fastest Route to Effective Vendor Managed Inventory (VMI)

To quickly establish stronger distributor relationships that lead to increased sales and reduced inventory costs, you need **Datalliance**®. Delivered using the Software as a Service (SaaS) approach, **Datalliance** is a comprehensive VMI service that enables suppliers and their customers to take an active role in VMI by facilitating collaboration across the Internet.

The most effective VMI solution available today, **Datalliance** is the fastest to implement and easiest to operate. **Datalliance** is a service, not a software product you install and maintain. Because it is a service, **Datalliance** requires no additional information technology staff or equipment to support your VMI efforts. With over 19 years of experience helping companies employ VMI solutions, **Datalliance** has the resources to get you up and running in just weeks. **Datalliance** ensures the shortest route to your VMI results by combining the latest technologies, a structured implementation methodology, and professional expertise.

Datalliance delivers the full range of VMI capabilities. It is highly effective for virtually any product mix and scalable to any number of locations. With **Datalliance**, you and your trading partners will increase profits by effectively managing inventory with minimal day-to-day effort.

LET US SHOW YOU WHY Datalliance IS THE BEST VMI SOLUTION FOR YOU.

BUSINESS BENEFITS OF VENDOR MANAGED INVENTORY

VMI is a streamlined approach to inventory and order fulfillment. VMI involves collaboration that changes the traditional ordering process.

To drive the order process, customers electronically send their daily demand information instead of purchase orders.

The business value of VMI is a direct result of increased information flow between trading partners.

These benefits include:

Reduced Inventory

- Increased Turns, reducing working capital requirements.
- Reduced warehousing expenses
- Reduced product damage
- Reduced returns

Improved Service

- Tighter business connection
- Improved cooperation

Increased Sales

- Reduced out-of-stocks
- Improved business relationships

PROVEN IN USE

Recognized as the leading independent supplier of Vendor Managed Inventory (VMI) services, Datalliance VMI manages billions of dollars in orders, millions of SKUs, and thousands of locations every day. Results from a recent industry report illustrate the market acceptance of **Datalliance** VMI.

In that report:

Datalliance VMI received the highest cumulative rating of all VMI solution providers on "business" factors related to VMI:

- Speed to Value
- Support and implementation
- Customer reference strength
- Industry-specific differentiators

Datalliance VMI received the highest rating (5 on a scale of 1 - 5) in the following categories:

- User Interface / Experience
- Connectivity and Visibility

Comments from interviews with Datalliance customers were universally positive:

"Implementing the Datalliance VMI service was a breeze compared to systems projects where we had to install and set up everything ourselves. Datalliance's solution is enhanced several times a year with no effort or disruption on our part at all"

"Customer care has been the best customer service experience I've ever had, personally or professional."

Datalliance – Your Comprehensive VMI Solution

FAST, EFFECTIVE IMPLEMENTATION

Datalliance is a fully operational system designed to accelerate the delivery of business results. It is ready to implement with well-defined tools and expert assistance.

The **Datalliance Implementation Team** are experienced professionals who will apply the knowledge gained from many environments to your organization.

The **Datalliance Implementation Process** is a proven, documented methodology that ensures fast, efficient implementation. Our process speeds the effort while verifying that all steps are well executed before you go live.

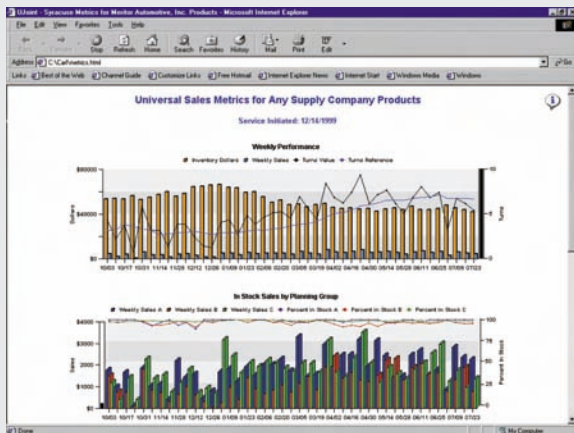

Configurable Application Features make it easy to tailor the system to your specific needs without special programming or custom modifications.

COMPREHENSIVE VMI FUNCTIONALITY

Datalliance's advanced capabilities support the unique requirements of a VMI relationship and provide superior inventory management logic:

Customer Data Acquisition, Translation, and Verification simplifies and automates the complex task of getting timely and accurate product activity from each customer location.

Replenishment Order Generation and Transmission accelerates your responsiveness by automatically generating demand-driven orders for your customers' system in the desired format.

Activity and Analysis Reporting tells you where you are, where you have been, and how you got there, through graphic representations of your inventory information.

ADVANCED SYSTEM DESIGN

Datalliance combines sophisticated VMI capabilities with advanced application design principles to deliver a solution that is both powerful and user-friendly.

Data Filtering and Reasonableness Checks throughout the system are based on an exception-driven approach. Users are alerted to potential problems without wading through long, complicated reports.

Sophisticated Order Point and Order Quantity Calculations handle products with any combination of order frequency, rate of sale, and price point to ensure you always have the right product, at the right place, at the right time.
